

## Kurikka Timber Oy NEW INFORMATION

20.8.2008

Dear valued customer

Suolahden Höyläämö is now Kurikka Timber. The change stems from the continuous growth and internationalisation of our business operations.

The new name does not entail changes in our principles of operation or the ownership of the company. We will continue to serve the window manufacturing industry with the dynamic touch of a private family-run company. We invest in product development, the high quality of our products, and good service.

The objective with our product development is to better respond to future challenges posed, for instance, by energy-efficiency.

Investments made in recent years have considerably increased our production capacity. Our flexibility in terms of delivery amounts and batch deliveries enable our clients to operate more effectively. The densely grained pine from Central Finland makes an excellent raw material for window frames. The versatile options for reshaping and surface finish offer considerable benefits for our clients.

We will endeavour to be a supplier you can rely on far into the future, too.

With our best regards,  
KURIKKA TIMBER

Jaakko Kurikka  
Managing Director
